CCD-1 CARD A — FRONT

Copper Creek Dam: what has happened

> **THIS IS AN EXERCISE** in an invented community (the Juniper Plains Area). Every form, message and net call says so. If anything real happens, anyone says **"REAL WORLD"** on the net or in the room and the drill stops. Never call 911 for the drill.

07:50, SUNDAY 21 MARCH

- Three days of warm rain on deep snow. Copper Creek Dam has seeped since last evening; at 07:40 the seep started carrying mud.
- The sheriff orders Copper Ridge below Route 30 and the Copper Creek corridor through south Larkspur **out now**.
- The Larkspur River bottoms from Center Street to Alder Flat are **warned**: get ready to leave.
- +4 °C, light rain. Most members are getting ready for 9:00 sacrament meetings.
- Phones work for now. Nobody knows how long the dam will hold.

YOUR FIRST FIFTEEN MINUTES

1. **Your own family first.** In the order zone: leave now, by the routes the sheriff gives.
   Then go to your assignment: the EOC, your ward's gathering point, your radio.
2. **Bishops and Team Leaders:** account for members and missionaries in the zones.
   Who has left, who needs a ride, who will not leave.
3. **HAM operators:** check in on the stake net and stand by.
   The specialist recommends the PACE level (Primary, Alternate, Contingency, Emergency), the Stake President decides it, the net announces it.
4. **EOC operators:** open the Message Center, confirm the drill event and the level.
   First SITREP (situation report) as soon as you have a first assessment.

CCD-1 CARD A — BACK

Who is in this drill and how traffic moves

EOCS (EMERGENCY OPERATIONS CENTERS) AND PARTNERS

EOC	LEVEL	PEOPLE	WINLINK
Larkspur Stake	Stake EOC	always	SIM-LKS
Copper Ridge Stake	Stake EOC	optional	SIM-CRS
Alder Flat Stake	Stake EOC	optional	SIM-AFS
Larkspur East Stake	Stake EOC	optional	set at the drill
Larkspur West Stake	Stake EOC	optional	set at the drill
Juniper Springs Stake	Stake EOC	optional	set at the drill
Kestrel Stake	Stake EOC	optional	set at the drill
Saddleback Stake	Stake EOC	optional	set at the drill
Council / Area EOC: Juniper Springs Stake Center	Council / Area EOC	optional	SIM-JPA
Larkspur City EOC	Partner agency (ICS forms only)		SIM-LKCITY
Copper Ridge City EOC	Partner agency (ICS forms only)		SIM-CRCITY

> The **Larkspur City EOC** does not run our system. It asks for Helping Hands crews with **ICS 213RR** (Incident Command System) Resource Requests on Winlink's standard form; the stake answers with an **ICS 213** General Message. Never send it Church forms.

THE PACE PLAN

LEVEL	PATH	IN THIS DRILL
P	Cellular	Text or email the form file from the phone
A	Any internet anywhere	Home, shelter, business, meetinghouse or Starlink Wi-Fi
C	Radio	Winlink by VARA FM to the stake EOC, then VARA HF (VARA: the radio modem Winlink uses); voice on FRS/GMRS (Family Radio Service / General Mobile Radio Service) and the stake net
E	Runner	Paper form carried to the EOC

- Step down after **two failed attempts in 15 minutes**; step back up only after a round-trip test.
- Life safety first: injured, missing and missionaries go at the top of every report.
- Training messages are numbered **CCD-1 NN** in drill-clock order.
- At the end: the hot wash. Bring what went wrong; that is the point.

DRILL CONTROLLER AND EVALUATORS

CCD-1 CARD B — FRONT

Running CCD-1: setup and the timeline

BEFORE THE SESSION

1. **Start the EOC (Emergency Operations Center) server and the simulator** on the Stake EOC laptop.
   Simulator Setup: organization pack = the example community (EOC Message Center\simulation\example\juniper-plains), then the drill configuration in its simulation folder (EOC larkspur).
2. **Open a fresh drill event** on every EOC (DRILL in its name).
   A drill event left over from a rehearsal keeps its SITREP (situation report) clock and traffic.
3. **Plan the run** (Copper Creek Dam failure, same seed on every laptop); check the Run tab lists the items.
4. **Hand out the cards** and the role cards (Roles tab). Load the Winlink training set on the HAM (amateur radio) stations.
5. **Say go and press Start** (or Schedule a start time on every laptop).

PACE TIMELINE: PRIMARY, ALTERNATE, CONTINGENCY, EMERGENCY (THE SCENARIO SETS IT; PLAYERS SHOULD REACH THE SAME DECISION)

WHEN	LEVEL	WHY
T+0 (07:50)	**P** Primary: cellular	Cellular is up but congested: one call in three fails and texts arrive late; data works.
T+80 (09:10)	**C** Contingency: radio	The Copper Creek substation flooded at T+75 and the fibre under the Route 12 bridge was cut at T+78: cell sites in the south half are off the air. Two failed attempts in 15 minutes (T+72, T+78): the specialist recommended Contingency, the Stake President decided, the net announced it.
T+175 (10:45)	**A** Alternate: any internet	Internet works in the north half (home Wi-Fi, a business on Main Street) and the stake center has Starlink with a named operator; a round-trip test with the line above passed three times at T+170.
T+225 (11:35)	**P** Primary: cellular	Portable cell sites on generators serve the north half; a second round-trip test passed. The south wards stay on what works for them.

> Several EOC laptops: every simulator on the same scenario and seed; Schedule the same start time on each Run tab.

Done when, and what to watch

DONE-WHEN CHECKS (THE SCOREBOARD AND THE AFTER-ACTION REPORT)

- SITREP #1 generated by T+75 (first assessment as soon as possible)
- SITREP #2 generated by T+210 (the interval leadership set)
- Every missionaries need met (owned, mission office answered, closed when found)
- No high-priority need left without an owner
- At least 70% of the needs met (late counts half)
- Sunday meetings decided and recorded before members left for church (T+3 card)
- Member notification for the order and warning zones recommended, decided and announced in time (T+5 card)
- The Pine Hollow rumour verified with the county before relay (T+125 card)

PHASES

MINUTES	PHASE	WHAT HAPPENS
T+0 to T+38	**Order and warning**	Sunday morning, steady rain, the creek brown and loud. Deputies drive the streets below the dam with loudspeakers; cell broadcast alerts reach most…
T+38 to T+80	**Breach and flood wave**	At 08:28 the embankment goes. A wall of brown water takes the Route 30 bridge at Copper Ridge and cuts the town in two; the retirement village…
T+80 to T+160	**Contingency: radio and runners**	The south half of the valley is dark and silent except for radios. Reports come by Winlink VARA FM, by net cards and by a soaked runner. The river…
T+160 to T+240	**Holding through a cold, wet night**	Rain turns to wet snow. Internet returns in the north first; the stake steps up to Alternate after a round-trip test and to Primary for the north…

Watch for: the 9:00 meetings decided by the Stake President; members in the zones notified on the specialist's recommendation; the care center moved by county transport, with a roll call at the destination; missionaries owned within 10 minutes; the second-dam rumour checked with the county before anything goes out.

At the end: Hot wash tab → **Gather evidence from the EOC**, then the after-action report.

CCD-1 CARD C — BACK

City EOC requests (ICS 213RR) and answers

NO.	TIME	FORM	FROM
CCD-1 08	08:50	ICS 213RR	Larkspur City EOC: Sandbag crews River Road
CCD-1 09	09:12	ICS 213RR	Larkspur Stake EOC: High-water vehicle care center
CCD-1 11	09:45	ICS 213RR	Larkspur City EOC: Moving crews Riverside
CCD-1 14	10:15	ICS 213RR	Larkspur Stake EOC: Fire-safety check stake center
CCD-1 15	10:25	ICS 213RR	Larkspur Stake EOC: Drinking water warming centres
CCD-1 17	11:00	ICS 213RR	Larkspur City EOC: Warming centre staff tonight
CCD-1 21	11:25	ICS 213RR	Larkspur Stake EOC: Generator fuel overnight
CCD-1 23	11:34	ICS 213RR	Larkspur City EOC: Mud-out crews tomorrow

1. **A request arrives** from the city's call sign: the EOC files it as a work item named for the city.
2. **Own it and decide**: the Stake President or the Emergency Response Director says yes, how many, from which wards.
3. **Answer with an ICS 213 General Message** from Winlink's ICS USA Forms: what you send, where, when, who leads.
4. **Close the loop**: the crew's Work Crew Log comes back to the stake EOC as a Church form.

> Keep the requests short and numbered. Never put Church forms, member names or ward details in a message to the city.
